

Seminar: Macroalgae in animal production: new opportunities and bottlenecks.

Bodø, 20th March, 2012.

PRELIMINARY PROGRAM

- 09:30-10:00 Åsbjørn Karlsen, Research manager and Head of Bioforsk Nord Bodø: "Welcome and introduction to Bioforsk Nord Bodø"
- 10:00-10:30 Céline Rebours, Research scientist at Bioforsk Nord Bodø: "The value of algae as feed"
- 10:30-11:00 Sten Siikavuopio, Senior research scientist at Nofima marine: "Challenges to use algae as feed ingredients"
- 11:00-11:30 Jeanette Hammer Andersen, Platform leader, Marbio, University of Tromsø: "Algae in the marine bioprospektering perspective".
- 11:30-11:45 Discussion
- 11:45-12:30 Lunch
- 12:30-13:00 Margarita Novoa-Garrido, Research scientist at Bioforsk Nord Bodø: "Research results in utilization of seaweed in animal feed from Bioforsk Nord Bodø"
- 13:00-13:30 Eduarda Molina Alcaide, Prof. at the Spanish National Research Council: "Unconventional feedstuffs for ruminants in Mediterranean ecosystems"
- 13:30-14:00 Jörg Feldmann, Prof. at the University of Aberdeen: "World record holder in arsenic and iodine eating: seaweed-eating sheep from North Ronaldsay, Orkney (Scotland)"
- 14:00-14:15 Discussion
- 14:15-14:30 Break
- 14:30-15:00 Yvan Larondelle, Prof. at Université catholique de Louvain: "Improving dairy production in terms of milk fatty acid profile and environmental impact: *in vitro* and *in vivo* approaches"
- 15:00-15:30 Egil Prestløkken, Associate prof. at Norwegian University of Life Sciences: "Methods for evaluation of nutritive value of macroalgae in ruminants"
- 15:30-16:30 Discussion and close of the session

Language: English

Place: Bodø (place to be updated later)

Contact person: margarita.novoa-garrido@bioforsk.no

Deadline to sign up: 5nd March, 2012 (**Any food allergies or intolerance must be communicated**)
